about the cosmetic product

Lipid Care

**Clinical application study under dermatological and control and determination of
trans-epidermal water loss**
(Test period March/June 2023)

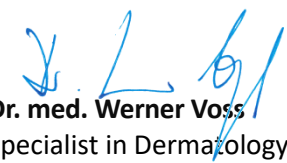

The test product was applied during a period of four weeks by 20 subjects once daily on the body (on the affected skin area). Determination of the trans-epidermal water loss carried out under clinical-dermatological control showed

improvement of the trans-epidermal water loss by - 17,9 %

in the test area.
